CAREER SUMMARY:

Passionate and results-driven software engineer specializing in Artificial Intelligence and Data Science. Dedicated to automating the integration of development and operations using AI throughout the software development lifecycle.

WORK EXPERIENCE:

V3 solution

Python Developer | April 2023-Aug 2023

- I've worked as a python developer at V3 Solution.
- My major work was related to AI (Artificial Intelligence). Working there on Deep learning model and Gen Image AI. Also worked on Django framework.

Free Lancing

Free Lancer | 2023- Feb 2024

- I worked as a part-time freelancer and provided my services on AI model training, Data annotation, NLP, Classification, etc.
- Completed all of my projects within given time, ensuring customer satisfaction.

RELEVANT PROJECTS:

Alzheimer Disease Classification | Freelancing Project

- Trained a DemNet model over ADNI 5 class dataset.

Unhealthy Teeth Detection | V3 Solution

- Used YOLO v5 to detect unhealthy teeth in panoramic X-ray images.

Brain Hemorrhage Detection | V3 Solution

- Trained a YOLO v8 for detecting bleeding spots on brain, for 5 classes.

Plant Disease Detection | FYP

- Trained YOLO v8 to detect leaf diseases in plants. Trained for 27 classes.

EDUCATION:

2020 - 2024 | National Textile University

Bachelor of Science - Software Engineering

SKILLS:

- Data Science
- Artificial Intelligence
- Deep Learning
- Data Preprocessing
- Django Development
