WORK EXPERIENCE

Resident Engineer Nestlé

01/2024 - Present

Achievements/Tasks

- Employed at E2E, but working at Nestle premises and operate under their management.
- Developed multiple software modules using MVC (Model-View-Controller) and ASP.NET Web Forms technologies to cater to various departments within Nestle.
- Managed the development of new software projects and provided global support for Nestle's existing software applications.

Associate Software Engineer XISYS Consulting (Pvt.) Ltd.

08/2022 - 12/2023

DHA, Lahore

A multi-disciplined IT Consultancy specializing in the UK in AI, cyber-security, and software development services.

Achievements/Tasks

- Successfully developed and deployed a cross-platform desktop application using .NET Core and MAUI, leveraging their powerful features and capabilities to create a unified user experience across different operating systems.
- Maintained and updated existing web applications, resulting in improved functionality and user experience with ASP.NET and C#.
- Collaborated with a cross-functional team to design, develop, and integrate new features into the application, significantly improving the product's functionality and expanded platform support.

Software Engineer Intern Raheem Solutions (Pvt.) Ltd.

05/2021 - 08/2021

Johar Town, Lahore

Achievements/Tasks

- Developed and implemented responsive and user-friendly web pages using HTML, CSS, JavaScript, and PHP.
- Received positive feedback from team members and supervisors for my strong work ethic, adaptability, and eagerness to learn, making a significant impact on project outcomes.

PROJECTS

Employee Portal

- An intuitive employee portal for Nestle, focusing on streamlining various global processes and enhancing user engagement. The portal integrates multiple modules aimed at optimizing internal communication, task management, and resource allocation, ultimately improving productivity and collaboration across the organization

AIOTrust

- Device registration and access management cross-platform application for client.
- Windows Custom Credential Provider.

IAM Product

- IAM is a comprehensive Identity and Access Management (IAM) and Asset Management application designed to streamline and enhance the security and efficiency of organizational operations. With its intuitive interface and robust features, AIO simplifies the management of user identities, access privileges, and organizational assets.

SecurEnvoy

- Identity and Access Management System project for client.

Construction Services Marketplace - Final Year Project

- A web application that helps you find construction companies. The application is meant to act as a mediator between construction companies and clients. Built using the MERN Stack.

Restaurant Management System - Semester Project

- Helps restaurant managers to add as many products as they want. Can keep a record of quantity, price, discount, and bulk orders. Built using C++.

Complain Management System - Semester Project

- A software program that allows companies to address customers' inquiries, deliver consistent support, and manage complaints promptly. Built using Java.
