

# Muhammad Ibrahim

Full Stack Developer (MERN)

Experienced Full-Stack Developer proficient in MERN stack and React Native with a strong focus on backend development. Skilled in Python, Flask, and Frappe ERPNext for building robust and scalable backend solutions. Passionate about crafting high-quality software that meets both user needs and business objectives.

## Professional Experience

### Full-Time Backend Developer

N SQUARE Technologies | March 2024 - Present

- Collaborated within a team to develop scalable backend services using Python and Flask, meeting project requirements and deadlines.
- Ensured seamless communication and optimal user experience by integrating backend functionalities with frontend developers.
- Contributed to improved application performance by assisting in the implementation of robust RESTful APIs for efficient data exchange and actively promoted agile development methodologies for enhanced productivity and faster feature delivery.

### Freelancing Project

Lecturely.com | December 2021 - January 2022

- I did a project with lecturely.com which is an Indian website.
- Played a key role in creating educational content that facilitates effective self-assessment and learning for aspiring web developers on the Lecturely platform.

### Freelance Content Creator

YouTube and Instagram | September 2021 - Present

- Created engaging and educational content on coding topics through Instagram reels and posts, collaborating with other content creators and industry experts to share knowledge and promote learning within the coding community.
- Produced video tutorials on coding concepts and technologies for YouTube, and actively engaging with the audience to foster a supportive and interactive online learning environment.

### WordPress Developer Intern

Digiware Solutions | September 2021 - October 2021

TheXpertz | October 2023 - December 2023

- I worked as a Web Intern and collaborated closely with a talented team.
