As a motivated SQA Intern, I bring a foundational understanding of SDLC, STLC, basic manual and automated testing techniques. With proficiency in creating test cases, identifying and documenting bugs, I am eager to contribute to your team and ensure the delivery of high-quality software solutions.

EDUCATION

Bachelors in Computer Science

Air University, Islamabad

09/2019 - 01/2024

Courses

- Programming (C++ , C#, python) , Object Oriented Programming , Databases (MySQL) , DSA, Artificial Intelligence, Software Engineering

Intermediate

Superior Girls College, Sargodha

07/2017 - 06/2019

Courses

- Pre-Engineering

WORK EXPERIENCE

SQA Intern

UBL Tower, Jinnah Avenue, Islamabad

05/2024 - 07/2024

Achievements/Tasks

- Strong understanding of Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC), including various stages such as requirement analysis, test planning and test execution.
- Strong understanding of both functional and non-functional testing methodologies.
- I created positive and negative test cases for Apply for a bank account, Careers and Internet banking login on the UBL website, then added them to ADO and ran them
- Strong knowledge of Test cases and Developed detailed test cases according to software requirements and specifications.
- Maintained clear and accurate documentation of test cases, steps, and results to ensure comprehensive test coverage and efficiency in software testing processes
- Acquired in-depth understanding of APIs, APIs error code and Postman API platform. Worked with GET requests in Postman to retrieve server information during my internship, enhancing my skills in API testing. Checked status codes by entering URLs in Postman.

SKILLS

Test Case Development

Test Execution

Functional Testing

Non-Functional Testing

SDLC

STLC

Manual Testing

Postman

Adobe Photoshop

Microsoft Office
