Highly motivated BSCS graduate with a strong foundation in computer science and a passion for crafting user-centric mobile and web applications. Skilled in building beautiful and functional applications using Flutter for native mobile development and ReactJS for interactive web experiences. Possess a comprehensive understanding of front-end development principles with proficiency in HTML5, CSS, and JavaScript. Additionally, I have experience with WordPress, providing a well-rounded skillset for content management solutions. Eager to leverage my technical abilities in a collaborative team environment and continuously learn new technologies. I am a quick learner with a problem-solving mindset, always striving to deliver innovative and high-quality results.

Willing to relocate: Anywhere
