

Umair Ahmed

SOFTWARE ENGINEER (INTERN)

As a recent graduate in Software Engineering, I bring a solid foundation in software design, data communications and software development. I have a foundational understanding of OOP principles. I understand concepts such as data querying using SQL. I have a basic understanding of JavaScript, which is essential for front-end development and adding interactivity to web applications. My strengths lie in communication and problem-solving.

SKILLS

Php (Hypertext Preprocessor)
Bootstrap

MySQL
HTML | CSS | JS | Reactjs

C++
OOP

EXPERIENCE

As a recent graduate in Software Engineering, I am entering the professional realm with a fresh perspective and a hunger to apply my theoretical knowledge to real-world challenges. While I may lack direct market experience, I approach every opportunity as a chance to learn, grow, and make meaningful contributions to the field of software development.

PROJECTS

Cinema Management System Graduated Project

The Cinema Management System is a web-based application designed to streamline the operations of a cinema, offering users an efficient and user-friendly platform for managing various aspects of cinema operations. Leveraging a combination of SQL, PHP, HTML, CSS, Bootstrap, and React.js technologies, this system delivers a comprehensive solution for ticket booking, scheduling, User Authentication and Security, Real-time Seat Availability and customer engagement.
