EDUCATION

SEECS | NUST Islamabad
BE Software Engineering

Islamabad, Pakistan
Oct 2020 - May 2024

EXPERIENCE

Geokits

Team Lead Web Development

Islamabad, Pakistan
April 2024 - Present

- Successfully led and mentored a team of two associate developers, fostering a collaborative and productive work environment.
- Spearheaded the development of a comprehensive web application using React.js for the frontend, Node.js for the backend, PostgreSQL for database management, and Firebase for data synchronization.
- Managed deployment processes using AWS and GoDaddy, ensuring reliable and scalable application hosting.
- Implemented advanced GIS technology solutions within the project, enhancing the application's geospatial capabilities and user interactions.

Developers Den LLC

Associate Software Engineer

Islamabad, Pakistan
Jun 2023 - Jun 2024

- Created dynamic and responsive frontends for websites using React.js and Next.js, ensuring seamless user experiences.
- Applied TypeScript in various projects to enhance code quality and maintainability.
- Leveraged modern libraries and frameworks such as Redux, Material UI, Tailwind, Radix, Ant Design, and Bootstrap to build robust and scalable applications.
- Transformed detailed Figma designs into high-quality, functional web pages, maintaining design integrity and responsiveness.

Logics Yard

Full Stack Developer

Lahore, Punjab, Pakistan
Feb 2023 - May 2023

- Built the backend of an NFT marketplace using Node.js, Express, and MongoDB, ensuring robust and scalable infrastructure.
- Created RESTful APIs to facilitate efficient data exchange and interaction within the NFT marketplace.
- Developed a dynamic and responsive frontend using Next.js, delivering an intuitive user experience.

T-Tech Solutions

Backend Developer

Rawalpindi, Punjab, Pakistan
Jun 2022 - Aug 2022

- Utilized Node.js, Express, and MySQL to build and manage the backend of a Point of Sale (POS) system.
- Designed and implemented RESTful APIs to facilitate seamless communication and data exchange within the POS system.

SKILLS

Programming Languages:	Javascript, Typescript, HTML, CSS, Python
Libraries and Frameworks:	ReactJs, NextJs, NodeJs, ExpressJs, Material UI, Redux, JWT
Databases:	MySQL, MongoDB, Firebase
Soft Skills:	Communication, Teamwork, Problem Solving, Adaptability, Time Management

PROJECTS

Blockchain Interbank Transaction System *Geth, Ethereum Blockchain, Solidity, Truffle, ReactJs, MongoDB, NodeJs, ExpressJs, Tailwind CSS, React Redux Toolkit, Material UI*

Made a solution for international transactions using Ethereum based private blockchain. The system used stable coins pegged to 1 PKR to send and receive money. The solution being on blockchain was more secure and transparent. A web based application was also made for the system.

Zonedrop *ReactJS, NodeJs, ExpressJs, Cloudinary, MnP Courier Portal, MongoDB*

<http://zonedropshipping.com>

Made complete e-commerce website for a dropshipping business. The Frontend of the app is made using React Js. The Backend of the app is made using Node.js. Integrated the website with MnP courier service for automation.

Realtime Ethereum Transfer Web App *ReactJs, Solidity, Hardhat, Tailwind, Metamask*

The app can transfer Ethereum from the wallet connected via meta mask with the app to other wallet by its address along with a message. All the transfer history was being saved in the blockchain. Developed the frontend on React Js. Developed smart contract in Solidity. Used hardhat to connect the smart contract with the frontend.
