EDUCATION

BSCS, IIUI

2020-2024

ICS, EFS&C

2018-2020

TECHNOLOGY

HTML, JAVA, C++, Word Press, Adobe Illustrator, Canva, entrepreneur, MS access, MS excel, MS power point, MS word.

EXPERIENCE

Teradata (Gulberg greens Islamabad-6 weeks internship)

There I had hands-on experience on Teradata database (data engineering department). I learnt how to work on Teradata database by working on fastload, multiload, bteq scripts, tpt scripts and shell scripts.

Word Press

KHAABA 360 Website

This website was designed using word press to help customers view menu and other details of restaurant online.

BHAWAJ CUISINE Website

This website was designed for my personal experience using word press for customers to order fresh and homemade food, snacks and many more.

AREEBA LEARNING ACADEMY (Entrepreneur)

I established my own academy to teach technology. I designed a course of Adobe Illustrator and taught 3 batches so far. Actively working to grow students and courses.

GRAPHIC DESIGNER/LOGO (Adobe Illustrator and Canva)

I have done a logo designing course online and practiced many logos. I have done a course of making vector portraits on adobe illustrator online from e-seekers and made a vector portrait as a final project of that course.

FINAL YEAR PROJECT (In progress)

The final year project is done in the group of 2. We are making a mobile application using android studio (in kotlin) for Innovative Marketing Company. IMC are traders of glass and aluminium sheets. This app helps its customers to view the details of product catalogue and can purchase in bulk amounts for discount offers. It does not allow cart options because as real customers want to check the material in hand at least once before final purchase. This app helps customers to make informed decisions from the comfort of their homes and also offers a chatbot from where they can chat with the admin. This app also allows customers to view their product in a 3D view.
