CAREER OBJECTIVE

I am driven by a deep passion for **Web Development**, fueled by a relentless pursuit of innovation. Eager to harness this passion to grow in ever-evolving realm of **Web Dev**. I am actively seeking opportunities within your esteemed organization to pioneer innovations, refine my skills, and collaborate with exceptional teams. Together, we can spearhead impactful projects.

PROJECTS

Athlotic Sports Website

Final Year Project

- A website to serve Athletes by providing them with high quality sportswear and different accessories.
- Utilized **Next.js** to handle front-end operations, providing user friendly and responsive interfaces.
- Utilized **Next's Server side** capabilities to handle back-end operations and **MySQL** database to store and manage data.
- Streamlined development by using **Visual Studio Code** and **GitHub** as **Version Control** reducing overall project time by almost 15%.
- Conducted extensive TESTING of functionality and user feedback analysis periodically, and eliminating bugs.

Library Management System

Semester Project

- A web based system was created to issue and return books from library and keep record of inventory. No manual entries are required.
- Our system seamlessly integrated with **PHPMyAdmin** database, enabling robust data handling and efficient management of library resources.
- Harnessing the power of **React.js**, we delivered a user-friendly interface to smoothen the navigation and enhanced user experience.

VOLUNTEER EXPERIENCE

In University of the Punjab

- **Computer Society** : Has been a part of the University's computer society since 2022 and serving roles as advised.
- **EMS Society** : Joined Event Management Society in 2023 of PUGC and proved myself in organizing different events.

AWARDS

- Bytes Battle 2023 Web Development Competition Winner (1st)
