Libraries: SQLAlchemy, Tailwind, Jinja, Pandas, NumPy, Matplotlib, Sci-kit, Gorm, Bloc.

EXPERIENCE

LAAM Technologies

Software Engineer I

Lahore, Pakistan

June 2023 – Present

• Responsibilities:

- * Developing and maintaining web application 'Laam.pk' and 'Partners App', focusing on performance and user engagement.
- * Enabling product growth and team success whether that means writing a QA plan or hunting down the root cause of a user's frustration.
- * Understanding diverse business cases and incorporating it into the work.

• Contributions:

- * Engineered the frontend of Laam.pk and Seller App using Nuxt3 (vue.js).
- * Designed and integrated order emails for Laam.pk, reducing shipment rejections for over 4,000 items and driving 100 unique visitors to the platform through email links.
- * Contributed to the development and enhancement of various products using Nuxt3, Flutter, Go, and Python, while implementing automated testing and deployment workflows to streamline development processes and ensure high-quality releases.
- * Resolved over 50 reported bugs in the Laam.pk web app during weekly on-call duties, improving system reliability and user satisfaction.

Codegic

Backend Developer

Lahore, Pakistan

Oct. 2022 – Nov. 2022

- Development in back-end services in Spring Boot Java with PostgreSQL. Developed the Rest APIs to carry out CRUD operations and designed the database using PostgreSQL

Systems Limited

Data Analyst Intern

Lahore, Pakistan

July 2021 – Sept. 2021

- Gained hands-on practical experience with SQL, SSIS, and Power-BI during an internship focused on learning and skill development.

PROJECTS

Rebuild of Partners App (Seller App) (LAAM)

- Engineered the frontend of Seller App in Nuxt3 (vue.ts) Typescript.
- Wrote unit tests in vitest and integration tests in Cypress.
- Engineered CI/CD pipelines using Github Actions and GCP to ensure smooth automated testing and deployments.

Emails Design & Integration (LAAM)

- Developed and integrated new order emails, reducing failed shipments for over 4,000 items and driving 100 unique visitors to the platform through email links.

Customer Management Service (CMS) (LAAM)

- Implemented the frontend of Customer Management Software (CMS) in Nuxt3 and worked on improvements and bug fixes in backend in Go. Implemented CI/CD workflows for smooth cloud deployments.
