PROJECTS

Employee Management System

Technologies Used: C#, SQL Server, CSS, Bootstrap

Description: Developed a comprehensive Employee Management System that streamlined employee data management, attendance tracking, and payroll processing.

Responsibilities:

- Designed and implemented the database schema using SQL Server.
- Developed the backend logic in C# to manage employee records, attendance, and payroll.
- Styled the front-end using CSS and Bootstrap to create a responsive and user-friendly interface.
- Integrated various modules to ensure smooth interaction between the user interface and backend.

Loan Management System

Technologies Used: C#, SQL Server, CSS, Bootstrap

Description: Developed a Loan Management System to manage loan applications, approvals, disbursements, and repayments.

Responsibilities:

- Designed the database structure using SQL Server to handle loan data and customer records.
- Implemented business logic in C# to process loan applications, calculate interest, and track repayments.
- Created a user-friendly interface using CSS and Bootstrap to facilitate easy navigation and management of loan data.

SKILLS

Languages & Frameworks: C, Python, C++, HTML, CSS, JavaScript, C# **Tools:** Visual Studio Code, SQL Server, Sublime 4 **Soft Skills:** Documentation, Communication, Collaboration, Adaptability, Problem Solving, Quick Learner
