ABOUT ME

I am a Computer Science graduate and accomplished senior full-stack developer with a strong focus on backend and mobile app development. I specialize in creating scalable systems and intuitive mobile experiences, consistently delivering high-quality solutions for client-based projects and company products. My expertise ensures seamless integration and optimal performance across platforms.

WORK EXPERIENCE

Sr. Mobile App Full Stack Developer

Falcon IT Consulting [01/07/2023 – Current]

City: Lahore | Country: Pakistan

- Developed cross-platform mobile applications using React Native, Redux, TypeScript, Node.js, and MongoDB.
- Established and maintained strong client relationships, delivering successful client-based and product-based projects.
- Provided mentorship and guidance to interns in mobile app development, leveraging my expertise as a senior full-stack developer with a 40-hour work week.

Software engineer

TechRydes [01/03/2022 – 30/06/2023]

City: Lahore | Country: Pakistan

- As a React Native Mobile and Backend Developer, played a key role in client apps and a company project.
- Consistent commitment to a 40-hour workweek in office settings.

Application developer

IT Empire [01/09/2021 – 28/02/2022]

City: Faisalabad | Country: Pakistan

- Different client-based mobile applications.
- Design UI and API integrations in all applications.
- Work in the office (48 hours/week)

Computer science lecturer

Govt. Postgraduate College [03/11/2020 – 30/06/2021]

City: Gojra | Country: Pakistan

- Instructed diverse computer science classes encompassing major and minor subjects, spanning computer design and other departments.
- Conducted theoretical and programming classes with a focus on practical application for students.
- Supervised final-year students in the completion of their projects and taught evening classes across various departments.

EDUCATION AND TRAINING

BS Honrs Computer Science

University of Agriculture, Faisalabad [09/2016 – 08/2020]

City: Faisalabad | Country: Pakistan | Website: <http://web.uaf.edu.pk/>

Intermediate

Punjab college [06/2014 – 08/2016]

City: Gojra | Country: Pakistan

Matric

Junior Model High School [04/2012 – 08/2014]

City: Gojra | Country: Pakistan

LANGUAGE SKILLS

Mother tongue(s): Punjabi | Urdu

Other language(s):

English

LISTENING C2 **READING** C1 **WRITING** B2

SPOKEN PRODUCTION B1 **SPOKEN INTERACTION** B1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DIGITAL SKILLS

Web Technologies Fundamentals - HTML, CSS / Html, Css, Bootstrap / Material Design - Material UI / JSON / JavaScript / Node JS / Nest js / React, React Native, React Hooks, React Router / React Hooks, React Redux / Express JS / Mongodb / Mongoose / Javascript, TypeScript / Firebase: Firestore, FirebaseAuth, Firestorage, RealTime database / Platform : AWS Cloud / Devops: Docker, Jenkins / Git/ GitHub / Socket.io(server-client) / Stripe Payments / Paypal integration / Agora.

PROJECTS

Baddour Led the front-end development of a mobile application for a car renting service catering to the US community. The application facilitates two user roles: car owners who can publish their cars, and renters who can rent available vehicles. Integrated Argyle for payroll account management of rentals and implemented payment systems using Apple Pay and Stripe. Extended functionality to include renting extensions, late fee management, and owner financial statistics and graphs. Additionally, I contributed as a team member to the backend development of the application.

Nutrition Coach Led the front-end team and served as the primary back-end developer for a platform with four user roles: Admin, Store, Coach, and Customer. Enabled product management and purchases with COD via Blue Ex. Implemented coach availability through slot creation and customer booking with payments via PayFast. Integrated Agora for video sessions and automated meeting token creation with a cron job.

Ezy Event As the developer of Ezy Event, I empowered users to create and manage events with an intuitive interface, featuring a robust gallery and precise location settings. The app streamlines communication through a services section, facilitating chat for easy access to catering, flower, and other event services.

Freelance Now Worked as front-end and back-end mobile app developer for a project enabling recruiters and applicants to interact seamlessly, including CV creation, skill showcasing, job posting, profile matching, chat communication, and streamlined hourly pay processes.

TeenY Coders Contributed to a collaborative backend Node.js project for a kids' online coding school, developing a comprehensive Learning Management System (LMS) with panels for students, teachers, and administrators. As a backend developer, I created CRUD modules, integrated Zoom and EasyPaisa, managed class timetables, and implemented features like assignments and quizzes with email functionality using Nodemailer.
