## EXPERIENCE

### **ZnZ Technologies (Internship)**

NOV 2023 – JAN 2024

During my internship at **ZnZ Technologies**, I collaborated with the backend team with a shared objective of achieving excellence in our projects. In my role as a backend developer intern, I took on responsibilities such as overseeing the architecture and security of the websites. Also taking my teammates along with the project was also my responsibility.

### **Nov 2021 – (FREELANCING)**

I have been freelancing as a full stack web developer, although my main purpose is to build websites but, because of my good understanding and playability with errors, I mostly handle errors in people's code.

### **MARCH 2021 – JULY (2021) (FREELANCING)**

I have been working as a freelance content writer. My responsibilities include writing an article on hair transplants containing 600 words or more. It was because of my interest in different disciplines that also includes writing due to which I have been a freelance article writer.

## EDUCATION

### **Bachelors,** UMT

I am currently enrolled in BS Artificial Intelligence.

### **INTERMEDIATE,** FORMAN CHRISTIAN COLLEGE

I have completed my intermediate from FC college. In college, I chose pre-engineering that does not include computers but because of the short courses I can perform best in computer.

### **MATRIC,** ALLIED SCHOOL

I completed my matric from Allied school in 2019 with an outstanding score. My significant subjects were Physics, Chemistry and Computer.

## Side Hustles

I write blogs at multiple platforms including:

- [Medium](#)
- [Blogger](#)
- [Panaverse](#)

## SKILLS

### Web Technologies:

- HTML
- CSS
- Jscript
- Chakra
- React Js
- Tailwind CSS

### Programming Languages:

- PHP
- Python
- C++

- Jscript
- TypeScript

### **Databases:**

- MySQL
- Neo4j

### **Frameworks:**

- Bootstrap
- Next Js
- Laravel

### **CMS:**

- Sanity

### **Other Skills:**

- **Programming Languages:**  
1.1) Prolog                      1.2) Assembly language                      1.3) Common Lisp
- **Designing Tools:**  
1.1) Canva                      1.2) Figma
- **AI Tools:**  
1.1) Machine Learning

### **My Technology Stack (Main Focus):**

- Python/Django
- TypeScript/Next Js
