CAREER OBJECTIVE

To leverage my extensive experience and technical expertise as a software engineer in designing and developing complex software solutions. With a proven track record of successful project delivery and a deep understanding of **software architecture, Agile methodologies, and DevOps practices**, I am committed to delivering high-quality, scalable, and secure software products that meet and exceed client expectations. I am seeking a challenging role that allows me to utilize my technical and communication skills to drive innovation and growth within an organization while continuing to learn and stay up-to-date with the latest industry trends and technologies.

EDUCATION

BS (CS) Computer Science
University Of Lahore (CGPA-3.1)

2020-2024

SUMMARY

- I have 1 year of Software designing & Development experience as a **full-stack** developer using multiple technologies.
- Experience in React JS, Angular JS, jQuery, and JavaScript for the **frontend technologies**.
- Experience in **ASP.Net** core web APIs.
- Experience in MS SQL.
- Understanding of **unit testing**.
- Understanding of **Design patterns** like Factory, Observer, repository, and singleton.
- Understanding of advance software development principles like **OOP, Solid principles**.
- I can efficiently use **AI technology** to perform a task effectively and in-time.
