### SUMMARY

PUCIT graduate with strong problem-solving skills and 4 months of experience in ASP.NET technology, including contributions to ERP software projects. Have strong grip on Databases, Stored Procedures, SQL Scripting. Proficient in Object Oriented programming (OOP), data structures and algorithms. Ready to apply my technical skills and problem-solving abilities in a dynamic development role.

### SKILLS

**Skills:** ASP.Net, C#, SQL, WebForms, JavaScript, HTML, CSS, BootStrap, C++

**Tools:** MSSQL Server, Visual Studio, Crystal Reports, Git/Github, Android Studio, Google Collab.

### EDUCATION

9/2020 - 4/2024 **PUCIT, University of Punjab**  
Bachelor of Information Technology

CGPA : 3.34

8/2018 - 7/2020 **Narowal Public School and College**  
Higher Secondary Certificate (HSC)

Grade : A+

### EXPERIENCE

4/2024 – 8/2024 **Dot Net Developer**

Soft Consults

Worked 4 months developing and maintaining ERP softwares using ASP.NET(Webforms) technology, with a focus on backend development. Also contributed in some projects as a Full Stack Developer.

### PROJECTS

ASP.Net

#### Financial Management System (Currency Exchange Company)

**Role:** Backend Developer

**Description:** : I have contributed in Financial Management System(FMS) for Currency Exchange Company in which i worked on their Employee Registration Portal and Currency Conversion Portal. I developed backend functionalities for an employee registration system, including user authentication, data validation, and integration with the main database. Also implemented backend services for currency conversion features, including real-time exchange rate calculations and transaction processing.

ASP.Net

#### Campus Management System

**Role:** Full Stack Developer

**Description:** : I have also contributed in Campus Management System for a University in which i worked on Assets Allocation Portal focusing on implementing functionalities to allocate assets based on user requirements and maintain accurate records of allocations. Designed and optimized database schemas to track asset requests, manage allocations, and update asset statuses

MERN

#### Online Tailor (Final Year Project)

**Supervisor:** Prof. Dr Amina Mustanser

**Role:** Backend Developer

**Description:** : I led a team in developing an online tailoring services website that offers custom stitching of dresses for men, women, and children. The platform allows customers to place orders through a website providing their measurements using an online size chart or by providing a sample dress to a rider. Orders, along with sample dresses, are delivered to the stitching department and the tailored garments are then delivered to the customer's doorstep.
