EDUCATION

Bachelors in Computer Science from UOL

December 2023

Relevant Courses: Artificial intelligence, Machine Learning, Deep Learning and Computer Vision.

Work Experience

Software Pattern

April - 2024 - Present

AI Engineer & Web Scraper: PyTorch, LLMs, Hugging Face Transformers, Numpy, Pandas, Matplotlib, BeautifulSoup, Scrapy, Selenium.

- Built image classification models using PyTorch or TensorFlow for tasks such as object detection or image segmentation.
- Developed and fine-tuned Large Language Models (LLMs) using Hugging Face Transformers for tasks such as text classification, sentiment analysis, and question answering.
- Developed a recommendation system.
- Proficient in web scraping techniques utilizing BeautifulSoup and Scrapy to extract structured data from various websites for analysis, data mining, or integration with other systems.

The Sparks Foundation Internship

Jan 2024 - Feb 2024

Data science and business analytics

Python, Pandas, NumPy, Git, GitHub, Docker.

- Utilized Python (or other relevant tools) to collect and clean large datasets for analysis.
- Identified patterns in customer data that resulted in targeted marketing campaigns with increase in ROI.

Final year project:

Car Facelift Design Generation Using Generative Learning

- We created a Dataset of car Facelift Images which was not available on internet.
- Our project aimed to use Generative Networks to generate realistic car facelift designs.
- Our project aimed to help Automotive Designers to design new Facelifts.

Certifications

-
- **Machine Learning Specialization**
Coursera
 - **Chat GPT Prompt Engineering**
Deep Learning AI
 - **Neural Networks & Deep Learning**
Coursera
