

Junaid Sajjad

Engineer

Profile

A highly skilled software engineer with a background in mobile phone assembly and disassembly, adept at managing maintenance operations to ensure optimal functionality and performance. Possesses comprehensive knowledge of software systems and their integration within hardware components, coupled with hands-on experience in troubleshooting and resolving technical issues. Demonstrated ability to collaborate with cross-functional teams to streamline processes and enhance productivity. Committed to staying updated with emerging technologies and implementing innovative solutions to drive efficiency and excellence in mobile device maintenance.

Employment History

Engineer at VIVO Electric pvt ltd

October 2020 — Present

Currently employed as an Engineer at VIVO Electric pvt ltd, contributing to various projects and initiatives. My responsibilities include:

- Utilizing Microsoft Office and Microsoft Excel for data analysis and reporting.
- Collaborating with cross-functional teams to ensure project success.
- Demonstrating strong communication and leadership skills to drive project progress.
- Adapting to work under pressure, ensuring timely and efficient project delivery.

Booth Operator at Inbox Business Technology pvt ltd

January 2017 — October 2020

Previously worked as a Booth Operator at Inbox Business Technology pvt ltd, where I was responsible for managing and operating booths at various events and venues. My accomplishments include:

- Demonstrated exceptional customer service and communication skills while interacting with event attendees.
- Maintained and operated booth equipment with precision and attention to detail.
- Collaborated with team members to ensure smooth operations during events.
- Adapted to dynamic and high-pressure environments, ensuring a positive experience for event attendees.
