Capital University of Science and Technology ✉

2019 – 2023 | Islamabad, Pakistan

Majors: Web Development, Computer Game Development

ICS(Physics), *Pubjab College of Commerce* ✉

2017 – 2019 | Rawalpindi, Pakistan

Majors: Physics, Maths, Computer Science

SSC: Science, *The Educators* ✉

2015 – 2017 | Rawalpindi, Pakistan

Majors: Physics, Chemistry, Maths, Computer Science

Professional Experience

IoT-Based Smart Room Automation System using Wireless Sensor Networks (FYP), *CUST*

06/2022 – 07/2023 | Islamabad, Pakistan

Led the development of an IoT-based smart room automation system using wireless sensor networks. Designed and integrated a wireless sensor network infrastructure, enabling real-time monitoring and control of room appliances through an Android application. Developed firmware and software for the central controller, optimizing energy usage and enhancing user convenience. Key skills utilized: IoT, Wireless Sensor Networks, Android App Development, Firmware Development, System Integration

Web Development, *Intern at tech choices*

08/2022 – 09/2022 | Islamabad, Pakistan

During this period my main task was to learn the basics of web development and complete a fully fledged wordpress website by the end of this internship.

Transcription, *Immesity Solutions*

07/2023 – 08/2023 | Rawalpindi, Pakistan

Accurate and efficient transcriptionist, turning audio into precise text.

Placement Officer, *Global Hire Pakistan*

09/2023 – present | Rawalpindi, Pakistan

I generated leads by contacting employers and explaining the LMIA process. Effectively communicated benefits and requirements. Actively pursued potential leads to promote understanding and interest.

User Interface Design (Figma),
Programming Languages (C++, C#, JAVA),
Graphic Designer (Canva)

Certificates

- Successful Participation in International Kangaroo Linguistic Contest 2018.

Organizations

Jamila Sultana Foundation,
Volunteer In Service 
07/2022 – 08/2022 | Rawalpindi, Pakistan

Projects

IoT base Smart Room Automation System,
Using Wireless Sensor Network
2022 – 2023
Creating an IoT-based smart room automation system with mobile app control. This solution offers convenience, energy efficiency, and personalized scheduling for room appliances. Smart sensors enable intelligent automation, while real-time energy data helps make informed decisions. Security measures ensure a seamless and secure user experience.

Mario 2D Game, *Unity 3D*
Created a 2D Mario game using Unity 3D, offering a nostalgic platforming experience with classic gameplay elements

Restaurant Website, *Web EGINEERING Project*
Developed a restaurant website that incorporates JavaScript along with HTML, CSS, and Bootstrap, enhancing interactivity and providing a dynamic user experience.

Courses

Blockchain Essentials, *Cognitiveclass.ai*
2023

Introduction to Cybersecurity Tools & Cyber Attacks, *Coursera*
2022

Information Security, *Coursera*
2022
