- Optimized web app performance.
- Regularly updated mobile apps and web-based admin panels for seamless performance.
- Fixed bugs and maintained updates to improve application stability and efficiency.

PROJECTS

Event Wave | Event planner Website

Developed as my final year university project, this event planner website allows organizers to create and manage various events such as concerts, seminars, parties, and more. Attendees can browse events, view detailed information, and join events seamlessly.

<https://eventwawe.vercel.app>

Trend Trove | E-Commerce Website

Developed a fully functional e-commerce website featuring user authentication, product listings, shopping cart functionality, and real-time database updates. This project honed my skills in frontend development, state management, and backend integration with Firebase
