An enthusiastic professional intending to continue my career as a Software Quality Assurance engineer and eager to apply foundational testing methodologies and contribute to ensuring software reliability, functionality and quality. Dedicated to learning and enhancing skills in test planning, execution, and defect identification to support project success and elevate user satisfaction.

Experience

FYP Evaluator

Sep 2023 - Jun 2024

Tech Stack:

- MERN stack (MongoDB, Express.js, React, Node.js)

Description:

- Created a Final Year Project Management Tool
- Improved collaboration and project management between students and advisors
- Added an 'Ideas Exchange' feature for real-time student-teacher interaction, making mentorship more effective
- Made project proposal management simpler and more efficient

Objective:

- Helped students easily propose, track, and get feedback on their projects

Semester Projects

- Cake Corner (Web Development course) Tools: VS Code, Python, Flask, MongoDB
- Online Stitching System (Software Engineering course) Tools: Jira, Draw.io
- Car Rental System (Software Construction and Design Course) Tools: C# , SQL
