ACADEMIC PROJECTS

Final Year Project

CryptoFlow(Cryptocurrency Application)

The application is designed to be deployed on both the Google Play Store and Apple App Store, leveraging Flutter's ability to create a single codebase for multiple platforms. This cryptocurrency application aims to provide a seamless and secure trading experience for users while leveraging Flutter's capabilities to deliver a high-performance and cross-platform solution.

Key Features:

1. User Authentication
2. Dashboard
3. Trading Engine
4. Market Data
5. Alerts and Notifications
6. Wallet Integration
7. Transaction History

University Employee Management System

For Frontend we have use Html Css Bootstrap, Javascript and for backenfd we have use Python, Django, SQLite3
