SUMMARY

Passionate about crafting innovative web and mobile applications for exceptional user experiences. I excel in front-end development, continuously learning and collaborating to refine my expertise in professional projects.

EDUCATION

BS Computer Science

Information Technology University • Lahore • 2024

• CGPA: 3.22

Intermediate in Computer Sciences

Punjab College • Lahore • 2020

• A+ Grade

EXPERIENCE

Back End Dev Intern

Zin Technologies

May 2024 - July 2024

- I learned the fundamentals of C# and then worked on projects using ASP.NET.
- This allowed me to build robust server-side applications and APIs, enhancing my ability to develop comprehensive software solutions and expand my full-stack development skills.

Teaching Assistant

Information Technology University

January 2024 - July 2024

- Served as a Teaching Assistant at ITU for the Multivariate Calculus course
- My role was to assist the professor in managing academic responsibilities

Front End Dev Intern

Ekkel Ai

January 2024 - February 2024

- At Ekkel AI, I developed frontends with React and TypeScript, working with teams to optimize user interfaces.

PROJECTS

Beginner Bytes (Final Year Project)

- Developed a gamified learning app inspired by Duolingo, focusing on teaching Python and integrating engaging gamification elements.
- Applied instructional design principles to optimize learning outcomes and foster effective skill development.
- Designed intuitive UI/UX with Figma before React Native, ensuring seamless user experience.

Fully Functional E Commerce Store

- Developed the frontend of an e-commerce store using React technology as my university project

Tower of Hanoi

- Developed Tower of Hanoi game for the web platform using pure HTML5, CSS3, and JS

SKILLS

C++, C#, Python

HTML5, CSS3, Javascript, Typescript

React, React Native, ASP.NET, MySQL
