EXPERIENCE

Web Development

NETSOL IT Technologies Comapany lahore

I completed my web development internship at Netsol Technologies, Lahore, where I focused on building and enhancing web applications using Nuxt.js. My work included developing responsive user interfaces with Tailwind CSS, collaborating with senior developers on bug fixing and feature improvements, and gaining hands-on experience with Git/GitHub version control, npm, and deployment workflows. This internship helped me strengthen my technical expertise, problem-solving abilities, and teamwork skills in a professional software development environment.
