## PROJECTS

Md2Pdf Generator(Easy Doc) ([Live Review](#))

Feb 2024

- Key Features include effortless editing with an intuitive interface, live HTML previews, syntax highlighting for code readability, interactive layout customization, and easy PDF generation for sharing.
- Easy Doc leverages powerful libraries such as html2pdf.js for PDF generation, **jQuery** for DOM manipulation, Showdown for Markdown to HTML conversion, Prism for syntax highlighting, CodeMirror for rich text editing, and Lucide for SVG icons.
- These libraries enable PDF generation, Markdown conversion, code highlighting, rich text editing, and interactive UI elements, making Easy Doc a robust document creation tool.
- **AI Integrated using Gemini API. For Text Generation like ChatGPT.**

CODE EDITOR ([Live Review](#))

July 2023

- For easy navigation, features like syntax highlighting, auto-indentation, code completion, and line numbers.
- Additional functionalities include a powerful find-and-replace tool for efficient code maintenance, making the editor a versatile and customizable developer environment.
- **JAVASCRIPT, CSS, HTML, AND CODEMIRROR** library Used in its creation.
