

RIDA NASEER

Software Engineer

An ambitious individual looking for a chance in the Software Engineering profession. Aptitude for swiftly picking up new Software Technologies. Capability to work in teams by providing valuable support. Desire to take on new challenges. Excellent interpersonal skills, flexibility, and a strong work ethic.

Work Experience

AIRCOD TECHNOLOGIES | Associate Software Engineer

August 2023 – Present | Lahore, Pakistan

AIRVIEWX | ASP .Net Core MVC, SQL Database

- Developed and maintained web applications with ASP.NET MVC, utilizing cutting-edge technologies like webAPI, Entity Framework core, Dapper, and three-layer architecture to improve overall application functionality and user experience as well as high-performance data access when necessary.
- Served as a support team engineer, contributing to Robotic Process Automation and developing custom middlewares and dependency injection.
- Worked extensively with SQL Server objects such as Tables, Views, Stored Procedures, Triggers, Indexes and Functions.
- Implemented client-to-server chat communication using SignalR for real-time messaging.
- Create multiple APIs(for create user, JWT Token, Add Products, upload and save image, prayertimes) also created Soap and Rest APIs and join them.
- Developed an API for SMS functionality and implemented OneSignal API for notifications.
- Utilized tools like DevExtreme for responsive UI components such as grouped dropdowns and pagination.

Projects

NEWS ASSISTANT (Final Year Project) | NodeJS, Python, NLP

June 2023

The platform for illiterate people who can use their voice to reach the news. They will speak in Mike about an article they want to hear, and the website will provide news articles and also read articles for users using Natural language Processing

WearWise | .Net Core Web Application (MVC), SQL

B2B e-commerce web application, enabling artists to upload artwork onto products. Implemented customer and artist roles, with a dedicated artist page for art uploads. Utilized Tailwind CSS, Bootstrap, and jQuery for a responsive frontend. Integrated SQL for backend data management, designed the database schema and used ADO.NET with stored procedures for efficient data operations.
