PROJECTS:

Dot NET/Dot NET Core

HR-Portal:

Developed Hr-System in .net 7.0 with **aspnetuser** authentication. Used **microservices architecture** and **MySql** code first approach. **Bootstrap 5.3** used as front end and **JQuery** libraries to fulfil UI requirements.

Wind Graph:

Wind Graph Project: Developed a dynamic charting application that displays data visualizations, consisting of six different types of graphs showcasing six entity values

Chatr.js, .net 7.0, **MSSQL**, **entity framework code first approach**

Garbage Collection System:

Garbage Collection Management System: Engineered a comprehensive company management software focused on waste management using .NET MVC 4 and Database-first approach.

BIIT Social App:

This project was **API** for android Social App (FYP). A single project where University can deal with social as well as educational purposes.

Android Java

BIIT Social App (FYP)

I completed my final year project (FYP) on an **Android Java** application with a .NET web API backend. The project was a social application that connects and provides a communication channel within an organization for different users, such as students, parents, teachers, and administrators. The project was developed using the following technologies:

- Android Java
- .NET web API
- MSSQL database

EXPERIENCE:

- .Net Developer at Excelorithm SMC (11 months).
- .Net Developer at FIT 3 months.

EDUCATION:

BIIT Arid Agriculture University

Bachelor of Computer Science (CGPA: 3.6)

2019 - 2023

Superior College Swan Camp

Pre-Engineering

2017 – 2019

CERTIFICATES:

Basic Python Workshop

BIIT
