

Saba Shabbir

DevOps Engineer

sabarajput036@gmail.com | +923416111963 | Lahore

Objective

To secure a prominent role within a forward-thinking company that aligns with my qualifications, where I can apply my training and skills to drive the organization's growth and success. I am actively seeking a stimulating and purposeful position in a renowned establishment to maximize the utilization of my training and skills, with a particular focus on DevOps Engineering, Linux System Administration, Cloud Computing, Networking, and Information and Communication Technologies, while making a substantial impact.

Experience

Linux System Administrator

Etisalat

July 2024 – Present

- Provided technical backend support.
- Managed IP whitelisting.
- Maintained control over ECM, CMS, Signoz, AWS CloudWatch, and RDS.
- Developed and maintained Bash scripts.
- Delivered customer support.

Junior DevOps Administrator

Contour Software / Shoplogix Division

March 2023 – Present

- Managed Linux systems at Shoplogix.
- Developed multiple scripts using automation tools including Ansible, Terraform, and Bash.
- Resolved issues in TeamCity builds.
- Led the migration from production Windows servers to Linux.
- Updated tools, managed configurations, and maintained infrastructure.
- Worked extensively with AWS services, including EC2, SNS, S3, AMI, CloudWatch, and RDS.
- Utilized GitLab for version control.

Linux System Administrator

PITC – Power Information Technology Company

October 2022 – March 2023

- Managed Linux systems at PITC.
- Subnetted all DISCOs (Distribution Companies) across Pakistan.

- Configured complete VLAN setups for DISCOs.
- Handled DNS configuration.
- Worked with LAMP stack.
- Deployed OpenStack, an open-source cloud platform, for various project implementations.
- Experienced in deploying OpenStack using Maas and Juju.
- Skilled in employing DevOps tools such as Ansible and Docker for automation and containerization.

Internship

PTCL (Pakistan Telecommunication Company Limited)

June 2022 – August 2022

- Studied Transmission and Switching.
- Engaged in Network Monitoring.
- Gained insights into Networking.

Trainee

NAVTTTC - National and Vocational Technical Training Commission

June 2021 – December 2021

- Completed Certification in Networking and Cloud Computing Technology from NAVTTTC.
- Completed a comprehensive Networking Course.
- Covered the fundamentals of Cloud Computing.

Skills

- **Linux System Administration:** Commands, Services, and Management.
 - **DevOps Tools:** Ansible, Docker.
 - **Kubernetes:** Understanding of concepts and deployment.
 - **CI/CD:** Troubleshooting Teamcity pipelines, Familiarity with Jenkins.
