SUMMARY

With over 2 years of expertise in modern web development, I am a committed and dedicated senior software engineer with a broad skill set spanning backend (.net core) and frontend (Javascript/Jquery). My philosophy is grounded in the belief that nothing is impossible with the right commitment and roadmap. I leverage the power of code to address real-world challenges, viewing information technology as the key to resolving global crises. I bring a proven track record of delivering results and thrive in dynamic environments where innovation meets

impact.

EXPERIENCE

Full Stack Developer

Nodlays

November 2021 - Present

- Played a key role in designing the architecture of various projects, contributing to the foundation and structural integrity of the systems.
- Implemented cost-effective strategies to significantly enhance system efficiency, showcasing a focus on optimization and resource management.
- Collaborated closely with clients, designers, business analysts, and Quality Assurance (QA) teams in the planning and execution of new modules and features, ensuring alignment with project objectives and client expectations.

PROJECTS

Zuptu

Nodlays • <https://prod3.zuptu.systems> • November 2021 - June 2023

- Contributed as a full-stack developer to Zuptu, an enterprise-level hierarchy management system comprising three core components: Enterprise Learning Management System (LMS), Document Manager, and Hierarchy Management.
- Integration of Azure Storage Blob for efficient data storage.
- Utilization of SignalR for real-time communication functionalities.
- Integration with Twilio for SMS notifications.
- Utilization of Quartz for task scheduling.
- Development of robust reporting capabilities.
- Design and implementation of calendar event functionalities to streamline scheduling processes.

I.T Valet

Nodlays • <http://usman78056-001-site10.gtempurl.com> • July 2023 – Present

- Contributed to the "IT Valet" project, an innovative platform akin to Fiverr, facilitating online hiring of sellers and professionals across various domains.
- Developed a comprehensive chatbot solution, enabling seamless communication between users and service providers within the platform.
- Implemented Stripe payment gateway integration to ensure secure and convenient transactions for users.
- Utilized SignalR technology to enable real-time communication features within the chatbot interface, enhancing user engagement and responsiveness.

- Leveraged Quartz for efficient job scheduling and management, ensuring smooth operation of critical tasks within the platform's backend infrastructure.

Food Safety Solution

Nodlays • <https://pro.foodsafety solution.com> • November 2023 – Present

- Served as a full-stack developer for a food safety solution project, expertly managing backend development with .NET Core and contributing to frontend development using Angular (Beginner Level).
- Played a key role in developing the backend infrastructure of the application using .NET Core, ensuring robustness, scalability, and security.
- Contributed to the frontend development using Angular, crafting intuitive user interfaces and ensuring a seamless user experience.
- Collaborated with cross-functional teams to implement essential features and functionalities aimed at enhancing food safety standards and compliance within the solution.

Overseas Aquatic

Nodlays

- Spearheaded the complete development of the "Overseas Aquatic" project for a client, aimed at promoting their store specializing in sea and freshwater species imported from various global regions.
- Managed all aspects of the project lifecycle, from conceptualization to implementation, ensuring alignment with client objectives and specifications.
- Designed and developed a robust web platform showcasing the diverse range of sea and freshwater species available at the client's store, enhancing their online visibility and customer engagement.
- Implemented features to facilitate seamless browsing, product discovery, and purchasing, enhancing the overall user experience and driving sales for the client's business.

Turbo Charger

Nodlays

- Took charge of the end-to-end development of the "Turbo Charger" project for a client, designed to streamline parts management for a turbocharger company.
- Led the project from inception to completion, ensuring that it met the specific requirements and objectives outlined by the client.
- Developed a customized solution tailored to the needs of the turbocharger company, focusing on efficient parts management, inventory tracking, and optimization of operational processes.
- Implemented features and functionalities to enhance the overall efficiency and effectiveness of the company's parts management system, ultimately contributing to improved productivity and cost savings.

Ripen Viking

Nodlays

- Led the complete development of the "Ripen Viking" project, serving as a product supplier management system for a client.
- Managed the intricacies of a complex system with 38 interconnected tables, ensuring seamless data flow and efficient operations.
- Designed and implemented a robust database schema to accommodate the extensive network of interconnected tables, optimizing data storage and retrieval processes.
- Developed intuitive user interfaces and functionalities to facilitate supplier management tasks, enhancing productivity and decision-making for the client.

Carlo Cloud

Nodlays

- Took charge of the entire development process for the "Carlo Cloud" project, commissioned by a client.
- Designed and implemented a comprehensive system specifically tailored for managing complex hierarchies of work orders.
- Developed intuitive interfaces and functionalities to facilitate seamless navigation and organization within the hierarchy, optimizing workflow efficiency.
- Collaborated closely with the client to ensure the final solution met their exact requirements and provided valuable insights into their work order management processes.

EDUCATION

Bachelor of Science in Computer Science

COMSATS University Islamabad • 2022 • 3.16

- Campus Programming Competition Gold Medalist

SKILLS

Asp .net Core, Linq, Entity framework, REST API, MS SQL Server database, Javascript, JQuery, Ajax, HTML, CSS, Bootstrap, Angular (Beginner Level) , Smarter , Plesk , Git, Swagger , Asana, Jira
