Lahore, Pakistan.

Matric(Computer Science) BISE LAHORE

04/2014 - 06/2016

Lahore, Pakistan.

PERSONAL PROJECTS

Event Management System (06/2022)

- University FYP Project
- We Make an ecommerce web application that is used to manage all the activity related to events. Instead of booking separately by visiting physically, an securely online centralized network provides all the services(booking services, venues availability, pricing etc) for a user under one platform. On the other hand, venders can also get opportunity of increasing their sales by providing services.

IOT Based Home Automation System (12/2021 - 01/2022)

- Semester Project
- We Make iot based home automation system that control many things remotely in your home. In this system that allows devices to be connected and remotely monitored across the Internet. In the last years, the IoT concept has had a strong evolution, being currently used in various domains such as smart homes, telemedicine, industrial environments, etc.

Website using HTML + CSS + JavaScript + Bootstrap (09/2021 - 01/2022)

- Semester Project
- I Make only a front-end website .Only Front-end part done with different Languages.And display many things means Styling,Colouring, Designing etc. from this front- end website.

Security Radar System (05/2019 - 07/2019)

- Semester Project
- We Make Security Radar System for the purpose of Security .When any object detect in the range of radar frequency or waves then its generate a Alarm. Radar systems transmit electromagnetic, or radio, waves. Most objects reflect radio waves, which can be detected by the radar system.
