## PROFILE

Looking for an entry-level position to kickstart my career in Software Engineering and where I can challenge my potential, utilize my skills while building upon my knowledge and grow my career exponentially.

## EDUCATION

2020

**M.Sc in Computer Science** - University of Sargodha - Pakistan

Coursework in Software Engineering, Data Structures and Algorithms, Programming languages, Enterprise application development, Database systems and management.  
Designed a project management & learning environment for a class of 30 students.

## CAPSTONE PROJECT

2020

**Online Medical Store**

This project is a web based medical store system. The project objective is to deliver online medicines. This system also helps the management to manage the ordering and sales information such as products and customers information in more effective and precise way. Finally all the information will be inserted into the databases, which previously holds all the ordering details and product information of a medical Store.

Development Platform: Asp.net, SQL Server, Visual Studio
