Hands-On Projects

Tech Stack:

Backend: Laravel

Front-End: Vue.js

Database: MySQL

Professional Experience:

HR Management System Development | Laravel & Vue.js

Overview:

Designed and developed a comprehensive HR Management System, utilizing Laravel for the backend and Vue.js for the frontend, resulting in streamlined processes and enhanced personnel management.

Key Achievements:

- **Integrated Solution:** Spearheaded end-to-end development, seamlessly merging Laravel and Vue.js to create a cohesive and efficient system.
- **Employee Management:** Implemented a unified solution for onboarding, record-keeping, and data updates, simplifying HR processes.
- **Attendance & Leave:** Established real-time tracking capabilities, significantly improving leave management efficiency.
- **Expense Tracking:** Enabled precise expense recording and budget management, ensuring financial transparency.
- **Performance Assessment:** Created interactive evaluation and feedback interfaces, enhancing the performance assessment process.
- **User-Friendly UI:** Designed an intuitive user interface for seamless interaction, enhancing user experience and adoption.
- **Data Security:** Implemented robust authentication measures to ensure data integrity and safeguard sensitive information.
