## PROFILE

As a dedicated professional SQA Engineer, I possess a keen eye for detail and a fervent drive to ensure unparalleled quality in software products. Employing a systematic and methodical approach, I craft and execute meticulous test cases, leaving no defect unnoticed and guaranteeing applications meet the highest standards of functionality, usability, and reliability. My passion for effective communication and cross-functional collaboration fuels continuous improvement in software development processes, elevating user experiences and upholding customer satisfaction.

## EMPLOYMENT HISTORY

Manual QA Tester, Cyber ICT Technologies

Lahore

Jun 2022 — Jun 2023

As a dynamic manual tester in Cyber ICT, I passionately delved into the intricate world of software testing, skillfully uncovering defects and elevating product quality through comprehensive testing methodologies.

**Fitbod** is an online workout application that is the easiest and most effective way to strengthen your pelvic floor muscles. The app is suitable for people with problems connected to their bladder, bowels, or pelvic floor muscles as it can be tailored to a specific exercise program and set to remind you when to do your exercise.

Responsibilities:

- Assisted in creating comprehensive test cases based on software requirements and specifications.
- Executed manual test cases and accurately documented test results, defects, and observations.
- Applied testing techniques like ECP, BVA and State Transition.
- Collaborated closely with the development team to analyze and resolve reported defects.
- Performed regression testing to ensure the stability of software functionality after bug fixes or updates.
- Gained hands-on experience with bug tracking tools like JIRA and Linear effectively managing and organizing defect reports.
