Architecture: Microservices, MVC

Management Skills: JIRA, Azure DevOps, Github, Gitlab TFS Requirements Gathering, Agile Methodologies, Team Management, Software Project Management

WORK EXPERIENCE

Arbisoft

July 2022 – Present

Senior Software Engineer

Labore, Pakistan

- Worked on an education sector application that aimed at streamlining the process of conducting final examinations for students through an automated system. The front-end of the application is in **Blazor** and the back-end is in **.Net 6**. The application includes a web portal and a mobile app.
- Currently Working on a project that facilitates a **server-less** video chat app in **Unity** which includes augmented reality features and several mini-games within the app. The front-end side is handled in **Unity Engine** and the back-end is written in **.Net 6**.
- **Led** a team of 4 engineers for a project that presented a significant challenge to me since this was the first time I had worked on this particular technology stack. However, leveraging my research and development skills, I successfully delivered the project while surpassing my expectations. The front end was in **ReactJS** and the back end was in **Django Python**.
- Managing the team and mentoring junior engineers.

TkXel

Oct 2021 – July 2022

Software Engineer

Labore, Pakistan

- Worked on a project that specializes in housing and property management, and the system covers all aspects such as properties, tenants, servicing, purchase orders, billing, payments, and HR. The system is designed using various technologies, including Classic ASP, Webforms, VB.NET, **ASP.NET MVC**, **ASP.NET REST API**, **Angular 13**, **ASP.NET Core**, and **MS SQL Server**. During my tenure, I worked on revamping and adding new functionalities to several project modules using **.NET Core** and **Angular 13**.
- Worked on a project that specializes in all kinds of insurance, including travel insurance, and partnered with various other companies to provide insurance services. The system is designed using technologies such as **ASP.NET MVC**, **Webforms**, **VB.NET**, **Angular 5+**, and **MS SQL Server**. During my time,
- I mostly worked on revamping, redefining, and optimizing the business logic of the existing system. I also maintained daily communication with the client.

Dtech Systems

July 2021 – Oct 2021

Junior .Net Developer

Labore, Pakistan

- Worked on a project comprised of an inventory and services system, which also featured a consumer app that enabled users to order various services such as plumbing, electrical work, and so on. The front end of the project is in **Angular 12**, the back end is in **.Net Core (REST API)**, and the database uses **MS SQL Server**.

Smartrix Technologies**Dec 2020 – July 2021***Junior Web Developer**Lahore, Pakistan*

- Worked on an ISP services management project, providing services in Canada. The project is designed in **ASP.NET MVC** for both front-end and back-end.
- During my tenure, I was a developer and support engineer for the project.

EDUCATION

NFC Institute of Engineering & Technology**Oct 2016 – Oct 2020***BS, Computer Science**Multan, Pakistan*

- **3.34/4.0 GPA**
- I was a member of the Sports Society, primarily participating in badminton and cricket. Additionally, I was also a member of the Dramatics Society and theater group.
