## Summary:

- Seeking a web development role, preferably in MERN stack, to utilize my 2 years of experience and contribute to innovative projects.
- Contributed to over 100 repositories on GitHub, showcasing my expertise in MERN stack development.

## Skills:

**Front-End:** HTML, CSS, JavaScript, React, Next.js, Svelte, Redux, Zu-stand, Tailwind, Bootstrap, Framer-motion, Sass, Stripe.

**Backend:** Node.js, Express.js, Post-man, Next-Auth, Clerk.js, Node-mailer. **Database:** Mongo- dB, SQL

**Full-stack framework:** Next.js.

## Education:

Bachelors of MECHATRONICS and Control Engineering, UET Lahore

2019-2024

## Experience:

### Web Developer Intern at Code Alpha

March 2024-April 2024

- Worked in the domain of web development and worked on different languages like Javascript , Typescript , Python enhancing code efficiency by **20%** while making CRUD operation's response time as low as **200ms**.
- Applied modern web development and modern technologies to build and contribute to over three real time projects.

### Robotics & Automation Intern at Hyundai

June 2024 – July 2024

- - Collaborated with the Plant Maintenance department, gaining hands-on experience with manual manipulators and automation processes within the automobile industry.
- - Applied modern concepts and knowledge to manage and complete two real-time projects involving PLC automation and robotics using Webots.

## Projects:

### • Style-Sphere: Punjab Fashion Allies

- Led the development of a web app for clothing buddy connections in Punjab using Next.js, Express.js, and MongoDB.
- Created a matching algorithm and integrated Nodemailer for communication
- Ensured robust security measures and scalable backend architecture.

### • Employee Management System

- Developed a full-stack application for managing employee data using Next.js, Node.js, Express.js, Tailwind, and MongoDB.
- Implemented Next-Auth and Clerk.js for user authentication, enhancing system security by at least **80%** than **traditional** apps.
- Enabled managers to efficiently manage employee data, improving administrative efficiency by **40%**.

### • E-Commerce Website for Phone Sales:

- Developed an e-commerce website for phone sales using Next.js, Express.js, Node.js, and MongoDB.
- Implemented Zustand for state management.
- Led both frontend and backend development, ensuring smooth functionality.

### • Game Support Ticketing System

- Created a CRM ticketing website for game support using Node.js, Express.js, MongoDB, and Nodemailer.
- Automated email notifications for ticket resolution.
