EXPERIENCE

August 2023-Present

Full Stack Developer, Uplift

As a Full Stack Developer at Uplift, I collaborated with a talented team to develop robust mobile and web applications. My key responsibilities included:

- **Data Flow Management:** Ensured smooth and efficient data flow between the frontend and backend, optimizing performance and reliability.
- **Component Implementation:** Designed and implemented reusable and scalable UI components, enhancing user experience and maintainability.
- **Backend Authentication:** Developed and integrated secure authentication systems, safeguarding user data and maintaining privacy.

Various Clients | March 2023 – Present

Full Stack Developer, Freelancer

As a part-time Full Stack Developer, I worked with many clients through various platforms including **Upwork**, **Fiverr** and some third party sources. Here are the key features of my freelancing experience:

- **Developed:** Full-stack web applications using the MERN stack.
- **Managed:** Multiple projects, ensuring timely delivery and client satisfaction.
- **Implemented:** Custom features and functionalities based on client needs.
- **Collaborated:** With international clients, providing technical expertise.
- **Resolved:** Complex technical issues, enhancing application performance.

EDUCATION

Sep 2022-Present

Bachelor's in computer science, University of Central Punjab

PROJECTS

Twitter Clone: A real-world social application inspired by twitter containing all the enriching features where users can tweet, engage and share their words with the world. This project utilizes MERN stack technology.

Kicks: An e-commerce mobile phone application built using React Native, Express.js, and MongoDB. This application allows users to buy and save their favorite sneakers. Admins have control over adding new sneakers to the application.

SKILLS

Technical Skills:

- **Programming Languages:** Proficient in JavaScript and TypeScript; Expert in Python.
- **Frontend Development:** Experienced in React.js, Next.js, Angular.js, TailwindCSS, MaterialUI
- **Backend Development:** Experienced in Node.js, Express.js, FastAPI.
- **Database:** Experienced in MongoDB.

Languages: Fluent in English, Native in Urdu
