- Web Development
- Computer Architecture

Experience

PEL **july 2022 – september 2022**
Back-End Developer Intern *LAHORE, PUNJAB*

- "I possess proficiency in backend programming languages such as PHP and Node.js, alongside their associated frameworks like Laravel and Express. With this expertise, I am well-equipped to develop highly dynamic web applications that cater to various functional requirements and user needs. My skills extend to creating responsive and feature-rich web solutions that can adapt and scale effectively in a dynamic online environment."

Infomir **november 2022 – july 2023**
Back-End Developer *LAHORE, PUNJAB*

- "For the past 8 months, I've been a vital part of the Infomir project as a dedicated backend developer. My role involved leveraging my expertise in PHP and Laravel to drive the project forward. During this time, I've contributed to the development of robust, high-performance solutions that meet the specific requirements of the project. Working at Infomir has not only honed my technical skills but also provided me with valuable insights into building efficient and scalable web applications. I've had the opportunity to collaborate with a talented team, learn from diverse experiences, and actively contribute to the success of the project. My experience at Infomir has further solidified my proficiency in PHP and Laravel, making me well-prepared to take on new challenges in the field of backend development."

Projects

infomir e-commerce platform | *php, javascript, mysql* **november 2022**

- "I've spent the last 8 months as a backend developer at Infomir, where I focused on building an e-commerce platform for the company to facilitate the sale of their products. My work involved harnessing my PHP and Laravel skills to create a robust and efficient solution. This experience has provided me with valuable insights and an opportunity to contribute significantly to the company's growth."

onlinequranpakteach.com | *HTML, JavaScript* **November 2021**
